Welcome to the Finnish history and old times with the help of digitised newspapers!

The National Library has digitised newspapers published in Finland from 1771 to 1910. They are available online. Some newspapers published after 1910 have also been digitised and are available in legal deposit libraries

Getting rid of the error sources

THE NATIONAL LIBRARY OF FINLAND

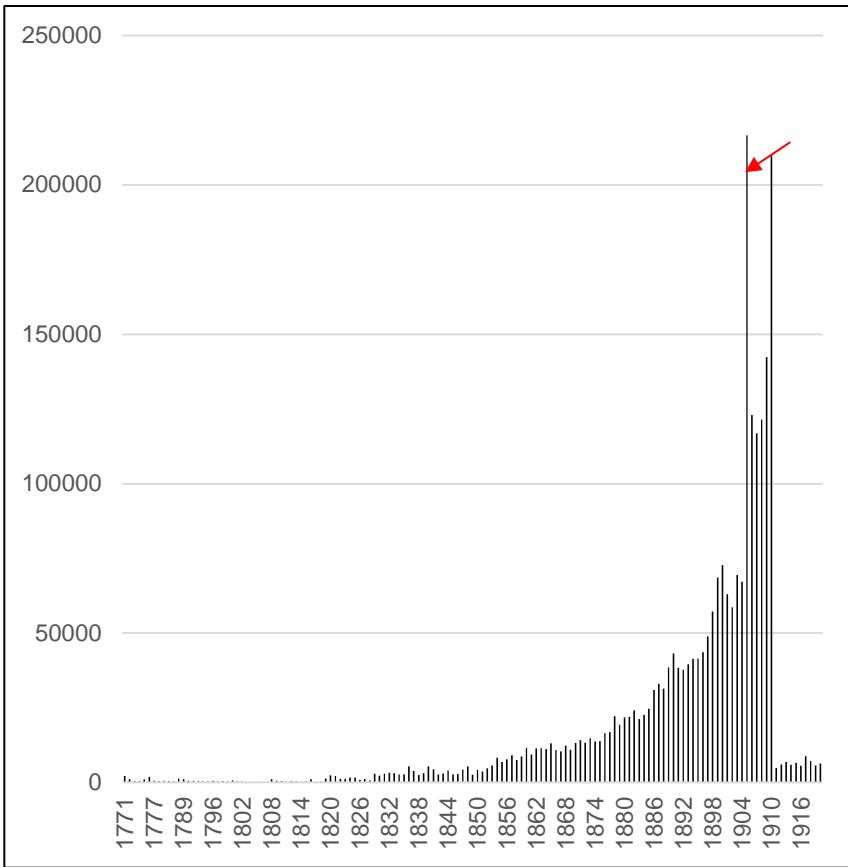

Two Approaches

- Start from the data.
 - Analyse the data to find anomalies.
- Start from a question or hypothesis. For example:
 - Does social media updates bring new users?
 - Users want access to recent material, so the most recent material is most used.

Welcome to Finnish history and old times with the help of digitized newspapers!

The National Library has digitised newspapers published in Finland from 1771 to 1910. They are available online. Even copyright based material is digitised in cooperation with e.g. newspaper publishers.

European digitised newspapers are available in [Europeana](#)-service.

NEWSPAPERS OF THE DAY:

THE NATIONAL LIBRARY OF FINLAND

Conclusions

- Analysing the user stats is useful. Even simple analysis can reveal much about the users and use of the system.
 - It is possible to verify information gathered from other sources by analyzing the user stats.
 - The analysis can also rise new questions.
-
- One must be careful with the dataset. There are many potential error sources.
 - The statistics of use measures just the use of the current collection and actions of the current users.

Thank You!
